NEW Dental Visual Communicator

NEW EASY view+

Dental Visual Communicator

Renfert EASY view+, the Dental Visual Communicator for digital object viewing. Digital visual capture allows you to better visualize, edit and share your daily work. In addition to classic live viewing with three zoom levels, you can spontaneously generate images at the touch of a button. Create videos via the direct interface to your laptop and share e.g. patient cases simultaneously with others. Simply use your familiar programs to edit the image files.

Advantages

- Three magnification levels (4x, 15x and 20x), for comprehensive detailed / microscopic viewing.
- Connection to your laptop* via an online meeting tool makes case discussion with the dentist easy and efficient.
- Free choice of monitor** allows for an individual adaptation to your needs.

Optional accessories: Renfert CONNECT *** (Renfert CONNECT stick and Renfert CONNECT app for integration into the network and wireless data synchronization between EASY view+ data storage and app).

* System requirements: Microsoft Windows® 10 and higher; Intel® Core™ i3 and higher | Apple® macOS® 10.15 and higher; Intel® Core™ i5 and higher.

** 3D function is only possible via Renfert monitor; 2D monitor with resolution 1920x1080 (Full HD)

*** For now only available in USA and EU. For further info please contact your dealer.

Details

- Image storage in the common JPEG image format.
- The 3D function combined with the low latency time enables precise, safe and natural hand-eye coordination (3D viewing possible at 15x and 20x magnification).

Additional lower magnification for improved comprehensive viewing
